### **Nu uita!**

**4 lucruri esentiale si 2 reguli de baza este reteta pentru ca un Windows sa ruleze perfect:**

- 1) Drivere la zi.**
- 2) Directx.**
- 3) Visual c++ toate versiunile**
- 4) Netframework toate de la 3.5 in sus.**

- 1) Instaleaza un antivirus bun.**
- 2) Nu instala soft-uri anonime.**

### **Utile:**

- 1) Cum Formatezi?**

**<http://www.sasnet.eu/p/formataresasnet.html>**

- 2) Sisteme de operare windows**

**<http://www.sasnet.eu/2016/05/windows-lite-project.html>**

- 3) Kit-uri necesare dupa formatare**

**<http://www.sasnet.eu/p/kits.html>**

- 4) Drivere**

**Va recomand sa dscarcati ultimele drivere de pe site-ul producatorului,insa daca**

**nu va descurcati puteti apela la drpsu <https://drp.su/download.htm>**

- 5) Securitatea computerului <http://www.sasnet.eu/p/securitatesasnet.html>**

**Nu recomand sa fi cobai-ul celor de la Microshit. Evita pe cat posibil sa faci "update la zi" la Windows 10 inainte sa te informezi!**

**Recomand sa dezactivezi update-urile automate si sa le activezi doar atunci cand apar versiuni stabile si finale al fiecarui Redstone.**
